## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, drawn to a miter saw with an idler gear.
  - II. Claims 3-17, drawn to a miter saw with a maximum distance between the blade and the upper guard being about 0.00353.
  - III. Claims 18-24, drawn to a miter saw with a first protrusion movably attached to the table.

The inventions are distinct, each from the other because:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the arbor having a first mesh gear meshing with an idler gear, which meshes in turn with a second gear driven by the motor. Invention II has separate utility such as the maximum distance between the blade and the upper guard being about 0.00353. Invention III has separate utility such as a first protrusion movably attached to the table. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Groups I, II or III is not required for each other Group and , restriction for examination purposes as indicated is proper.
4. During a telephone conversation with applicants representative, Mr. Adan Ayala, on April 30, 2003 a provisional election was made without traverse to prosecute the invention of

Art Unit: 3724

Group I, claims 1-2. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 3-24<sup>are</sup> withdrawn from further consideration by the examiner, 37

CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over the applicant's prior art in view of Grobbelaar (5,393,270). Applicant discloses on page 1, lines 7-20 all of the limitations in claims 1 and 2 except for an idler gear, which meshes in turn with a second gear that is driven by the motor via a belt. Grobbelaar teaches an idler gear 452, which meshes in turn with a second gear 448 that is driven by the motor 12 via a belt 50 in figure 7. It would have been obvious to provide an idler gear, which meshes in turn with a second gear that is driven by the motor via a belt in the applicant's admitted prior art as taught by Grobbelaar in

Art Unit: 3724

order to provide a safety mechanism, such as an idling mode of operation for the saw, to disengage the turning of the blade while the motor is running.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 703-305-4949.
